

Does insurance cover my care?

Yes and No... This is not as easy of a question as we'd like it to be. The short answer is that most health insurance companies now provide coverage for chiropractic care in their policies. The policy may be somewhat restrictive, but that depends on your particular provider. Some policies are a little more liberal, most people who have been injured at work, in their car, or are being covered by another personal injury insurer may do so with less restriction than most health insurance carriers. There is rarely any 'network' restriction to those who have been injured in an auto accident, therefore you may see any provider you wish. Ultimately the best way to find out the details of your insurance coverage is to call them. This is something we'd be happy to help you with.
